PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of professional experience and 3+ years of specialized freelance expertise in GHL CRM automation, AI agent development, and workflow integration. Demonstrated track record of delivering 90%+ automation efficiency gains across 5-10 enterprise clients. Expert in PHP, Laravel, React.js, and advanced automation platforms (Zapier, Make, n8n) with deep proficiency in AI model integration (Claude API, GPT-4, GPT-3.5, Gemini). Proven ability to architect scalable solutions, lead technical teams, and drive measurable business impact through process automation and AI-powered workflows. Seeking senior development opportunity targeting CZK 70,000-100,000/month in Czech Republic. LinkedIn-endorsed professional with strong client testimonials and recommendations.

CORE COMPETENCIES

Backend Development

- PHP (Expert) | Laravel (Expert) | Symfony (Advanced)
- RESTful API Design & Development
- LAMP Stack Architecture
- Microservices & Scalable Architecture

AI & Automation Specialist

- GHL CRM Setup, Optimization, Automation
- AI Model Integration (Claude, GPT-4, GPT-3.5, Gemini)
- AI Agent Development & Deployment
- LLM Integration & Prompt Engineering

CMS & Web Development

- WordPress Site Development & Customization
- WooCommerce Extension Development
- Custom Plugin Development & Integration

Frontend Development

- React.js (Advanced) | Modern JavaScript
- JavaScript (ES6+) | TypeScript
- Tailwind CSS | Bootstrap | Responsive Design
- Component Architecture & State Management

Workflow Automation Platforms

- Zapier (Advanced) | Multi-Step Workflows
- Make (Integromat) | Complex Integrations
- n8n Self-Hosted Automation Platform
- Webhook Development & API Orchestration

Database & DevOps

- MySQL | PostgreSQL | Database Optimization
- Query Performance Tuning & Indexing
- Git | Docker | CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Senior Web Developer

DevMechanix, Islamabad

Sep 2025 – Present

- Develop custom WordPress plugins and themes using MVC architecture; deliver 5+ production-ready plugins with advanced functionality for enterprise clients
- Build dynamic web applications with React.js and Laravel; implement full-stack LAMP solutions achieving 95% performance scores
- Architect scalable database solutions; optimize complex queries achieving 60%+ performance improvements through advanced indexing and query refactoring
- Lead technical reviews, code quality initiatives, and mentorship programs; establish coding standards and best practices across development teams

Senior Full Stack Developer

LeadConcept, Lahore

Sep 2024 – Sep 2025

- Built enterprise Laravel applications with real-time functionality using Pusher; integrated Google Drive and Google Ads Manager APIs for seamless data flow
- Integrated advanced OCR technologies (OCRSpace, RChilli) and chatbot solutions using Chatify; processed 100,000+ documents with 99% accuracy
- Designed and implemented RESTful APIs supporting 50,000+ concurrent users; implemented caching strategies reducing load times by 55% and improving user experience
- Managed large-scale database migrations and data transformation projects; migrated 25,000+ records with 100% data integrity; maintained 99.9% system uptime

Full Stack Developer

Canada Prime Marketing, Islamabad

Jul 2022 – Feb 2023

- Architected and built World Immigration Group B2B/B2C platform from scratch using Laravel and React.js; launched with 5,000+ initial users
- Improved website performance to 95% Lighthouse score; implemented advanced caching, CDN optimization, and image compression strategies
- Implemented multi-currency payment processing; integrated with 5+ payment gateways (Stripe, PayPal, Skrill) achieving 99.8% transaction success rate
- Built comprehensive admin dashboard with advanced analytics; managed 15,000+ user accounts and transaction history with real-time reporting

Software Engineer (Team Lead)

The Sots, Faisalabad

Jul 2021 – Jul 2022

- Led development team of 4 senior developers on HED KP Human Resource Management System built on Laravel; delivered 100% of project requirements ahead of schedule
- Designed enterprise-grade database schema supporting 10,000+ employee records; implemented role-based access control system with 12 permission levels
- Mentored junior developers and established coding standards; reduced code review cycle time by 40% through streamlined processes and automation
- Deployed to production with zero downtime; implemented CI/CD pipeline with automated testing achieving 95% code coverage

INDEPENDENT FREELANCE EXPERIENCE

Senior Automation Specialist & AI Developer — Independent Contractor

GHL CRM, AI agents, Zapier/Make/n8n automation, WordPress development | 5-10 clients served

3+ Years | 90%+ Efficiency Gains

- GHL CRM Expertise: Configured, optimized, and automated GHL CRM systems for 5-10 enterprise clients; implemented custom workflows achieving 90%+ process automation
- AI Agent Development: Built and deployed intelligent AI agents using Claude API, GPT-4, and GPT-3.5; integrated with client workflows for automated decision-making
- Workflow Automation: Designed complex multi-step automations using Zapier (Advanced), Make, and n8n; reduced manual processes by 70-90% across client operations

- CRM Migrations at Scale: Executed large-scale GHL migrations including 25,000+ contact bulk transfers; maintained data integrity with 99.9% accuracy
- Custom Integrations: Built custom API integrations connecting GHL with Salesforce, HubSpot, and external platforms; implemented webhook-based data synchronization
- WordPress Development: Developed WordPress sites with custom functionality; integrated with GHL, Zapier, and automation platforms for seamless workflows
- WooCommerce Solutions: Built and customized WooCommerce extensions; integrated payment processing, order automation, and inventory management systems
- Client Success: Achieved 100% on-time delivery record; maintained strong client relationships with zero churn and 5-star recommendations on LinkedIn
- Process Improvement Leadership: Developed best practices documentation and training materials; established automation standards for client implementation teams

KEY ACHIEVEMENTS & CLIENT IMPACT

Automation Excellence

- Achieved 90%+ process automation across 5-10 enterprise clients; reduced manual workflow time by 70-90% generating \$500K+ in cumulative client time savings
- Zero client churn record with 100% on-time delivery; received LinkedIn recommendations from 5+ satisfied clients citing exceptional results

AI Integration Pioneer

- Successfully deployed Claude API, GPT-4, and GPT-3.5 integrations into production client systems; improved decision-making speed by 60%+
- Designed intelligent AI agents for lead qualification, customer support automation, and process optimization generating measurable ROI

Large-Scale Data Management

- Migrated 25,000+ contacts in single GHL project; designed intelligent pipeline splitting logic maintaining 100% data integrity
- Processed 100,000+ documents through integrated OCR systems achieving 99%+ accuracy; automated document workflow reducing manual processing by 95%

EDUCATION

MS in Computer Science COMSATS University Islamabad	2021 – 2024
---	-------------

BS in Software Engineering COMSATS University Islamabad GPA: 3.6/4.0	2015 – 2019
--	-------------

PROFESSIONAL RECOGNITION

- LinkedIn-endorsed by 5+ clients in GHL CRM, Zapier, Make, n8n, and AI Integration expertise
- Multiple client testimonials highlighting 90%+ automation efficiency gains and exceptional project delivery
- 100% on-time project delivery record across 5+ year freelance career with zero client churn
- Team leadership experience mentoring developers and establishing technical excellence standards
