PROFESSIONAL SUMMARY

Experienced Automation Engineer and Full Stack Developer with 4+ years of expertise in designing and deploying enterprise automation solutions. Proficient in industry-leading automation platforms including Zapier, n8n, Make, and GoHighLevel. Demonstrated expertise in streamlining business operations, eliminating manual workflows, and reducing operational costs through intelligent automation. Strong background in API integrations, webhook handling, CRM tool configuration, and multi-layer workflow logic. Passionate about delivering scalable, reliable automation systems that drive business efficiency and growth.

TECHNICAL SKILLS

Automation Platforms: Zapier, n8n, Make (formerly Integromat), GoHighLevel, WordPress Automation, AI Agents

CRM & Business Tools: GoHighLevel (GHL), Lead Management, Email/SMS Automation, Sales Pipeline Optimization, Automated Outreach, Campaign Management

API & Integration Technologies: RESTful APIs, Webhook Management, API Authentication, Third-party Integrations, Data Mapping, Multi-step Workflow Logic

Backend Technologies: PHP, Laravel, MySQL, JavaScript, REST APIs

Frontend Technologies: React.js, JavaScript, jQuery, HTML5, CSS3, Tailwind CSS, Bootstrap, TypeScript

PROFESSIONAL EXPERIENCE

Automation Engineer

Adwater, Arizona, USA | September 2025 – Present

- Architected and implemented advanced automation systems across multiple platforms (Zapier, n8n, Make) to optimize business operations and eliminate manual repetitive tasks
- Designed and deployed comprehensive GoHighLevel solutions including AI Agents, WordPress hosting integration, smart sales pipelines, and automated customer outreach
- Developed complex workflow logic utilizing APIs and webhooks for seamless data flow between disparate business systems
- Delivered customized automation solutions tailored to varied business processes across multiple modern digital platforms
- Created scalable, reliable automation systems reducing manual workload by 80%+ and improving operational efficiency

Automation Engineer

Spark Digital Inc., Texas, USA | March 2025 – September 2025

- Developed comprehensive automation workflows across Zapier, n8n, and Make platforms to streamline critical business operations
- Integrated GoHighLevel CRM tools for automated lead management, email and SMS campaign execution, and sales pipeline optimization
- Implemented webhook handling and API integrations to enable real-time data synchronization across business applications

- Engineered multi-step automation logic to handle complex business scenarios including conditional routing and error handling
- Delivered scalable and efficient automation systems supporting diverse business use cases and improving team productivity

Full Stack Developer & Automation Engineer

Canada Prime Marketing, Islamabad | July 2022 – February 2023

World Immigration Group Project: B2B and B2C platform for training immigration consultants

- Optimized website performance from baseline to 95%, significantly boosting user traffic and engagement metrics
- Designed and implemented workflow automation using Zapier and GoHighLevel to streamline lead management and customer communication
- Developed automated email sequences and lead scoring systems to improve conversion rates and sales pipeline efficiency
- Built responsive user interfaces ensuring seamless experience across all devices and browsers

Software Engineer (Team Lead)

The Sots, Faisalabad | July 2021 – July 2022

Higher Education Department (HED KP) Project: Human Resource Management Solution

- Led development team in creating comprehensive website and professional CMS Portal for HR operations
- Architected scalable Laravel-based system meeting 100% of client requirements and enterprise specifications
- Automated HR workflows including employee data processing, payroll integration, and performance tracking
- Managed team collaboration, code reviews, and deployment pipelines ensuring system reliability and code quality

Junior Software Engineer

GlowLogix, Islamabad | January 2021 – March 2021

GleamHR Project: Human Resource Management Solution

- Developed and extended HR management software features, improving system performance by 93% through optimization
- Implemented database optimizations and code refactoring to enhance application responsiveness
- Collaborated with product and business teams to deliver features meeting user requirements and business objectives

Junior Software Engineer

Ecarobar, Islamabad | September 2019 – December 2020

Jetlocker Project: Smart Parcel Locker Management Platform (jetlocker.co)

- Developed innovative parcel locker platform solving last-mile delivery challenges for users and logistics companies
- Implemented secure authentication, automated locker allocation, and notification systems
- Built RESTful APIs for third-party integration with shipping partners and logistics providers

NOTABLE PROJECTS & ACHIEVEMENTS

Jetlocker Platform (jetlocker.co): Innovative parcel locker solution with automated allocation and real-time notification system

Higher Education Department Portal (hed.gkp.pk): Comprehensive HR and administrative management system serving 100+ government institutions

Multi-Platform Automation Solutions: Designed and deployed 50+ automation workflows across Zapier, n8n, Make, and GoHighLevel for diverse business operations

EDUCATION

Master of Science in Computer Science | COMSATS University Islamabad | 2021 – 2024

Bachelor of Science in Software Engineering | COMSATS University Islamabad | 2015 – 2019

PROFESSIONAL ATTRIBUTES

Expertise Areas: Workflow Automation, Process Optimization, API Integration, CRM Configuration, Lead Management Systems, Business Process Automation, Database Design

Soft Skills: Problem Solving, Process Analysis, Client Communication, Documentation, Project Management, Team Collaboration, Strategic Thinking
